The time period for reply, if any, is set in the attached communication.

Office Action Summary Examiner Bradley T. King

Application No. Applicant(s) 10/557.863 HALASSY-WIMMER ET AL. Art Unit

3657

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --Period for Reply

WHICHEVER - Extensions of ti after SIX (6) Mo - If NO period for Failure to reply Any reply received	IED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, R IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. In member available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely field ONTHS from the mailing date of this communication and a state of the communication of the communication of the communication and the provision of the state of the communication
Status	
1) Respo	nsive to communication(s) filed on
	ction is FINAL. 2b) This action is non-final.
3)☐ Since t	this application is in condition for allowance except for formal matters, prosecution as to the merits is
closed	in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.
Disposition of C	Claims
4)⊠ Claim(s) <u>8-14</u> is/are pending in the application.
	the above claim(s) is/are withdrawn from consideration.
	s) is/are allowed.
6) Claim(s) <u>8-14</u> is/are rejected.
7) Claim(s) is/are objected to.
8) Claim(s) are subject to restriction and/or election requirement.
Application Pap	pers
9)☐ The spe	ecification is objected to by the Examiner.
<i>,</i> — .	awing(s) filed on 21 November 2005 is/are: a)⊠ accepted or b)□ objected to by the Examiner.
	nt may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replace	ement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d)
11)☐ The oat	th or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.
Priority under 3	5 U.S.C. § 119
12) Acknow	vledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
	b) Some * c) None of:
1.	Certified copies of the priority documents have been received.
2.	Certified copies of the priority documents have been received in Application No
3. 🛛 (Copies of the certified copies of the priority documents have been received in this National Stage
	application from the International Bureau (PCT Rule 17.2(a)).
* See the	attached detailed Office action for a list of the certified copies not received.
Attachment(s)	

1) Notice of References Cited (PTO-892)

 Notice of Draftsperson's Patent Drawing Review (PTO-948) 3) T Information Disclosure Statement(s) (PTO/SE/08) Paper No(s)/Mail Date ___

4) Interview Summary (PTO-413) Paper No(s)/Mail Date.

5) Notice of Informal Patent Application. 6) Other:

Office Action Summary

Art Unit: 3657

SUPPLEMENTAL ACTION

A new office action follows which corrects the citation of the Bohm reference.

The response period has been reset to ONE MONTH. See MPEP 710.06

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 8-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 8 recites the

Application/Control Number: 10/557,863

Art Unit: 3657

broad recitation "first parameter", and the claim also recites "in particular a first measured value" which is the narrower statement of the range/limitation.

Regarding claims 8, 10 and 12, the phrase "preferably" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Claim 9 recites "the initiation". There is insufficient antecedent basis for this limitation in the claims.

Claims 10 and 12 recite "in conformity with". It is not clear what is required by this recitation

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8 and 12-14 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 02083473.

WO 02/083473 discloses all the limitations of the instant claims including; automatically actuating the brake (4) according to a predetermined program depending on a predetermined first parameter (friction coefficient limit), in particular a first measured value; and terminating the program depending on a predetermined second

Application/Control Number: 10/557,863

Art Unit: 3657

parameter (friction coefficient limit), preferably a second measured value, wherein the brake is automatically actuated in intervals.

Regarding claims 13-14, WO 02/083473 discloses a third parameter Tc which prevents the start of the braking program.

Claims 8-9 and 13-14 are rejected under 35 U.S.C. 102(b) as being anticipated by DE 10139908.

DE 10139908 discloses all the limitations of the instant claims including; automatically actuating the brake according to a predetermined program depending on a predetermined first parameter (TW), in particular a first measured value; and terminating the program depending on a predetermined second parameter (k decoding pulses reached), preferably a second measured value, wherein the brake is automatically actuated in intervals.

Regarding claim 9, the decoding pulses are representative of time, as broadly recited

Regarding claims 13-14, DE 10139908 discloses a third parameter SNC which prevents the start of the braking program.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made. Art Unit: 3657

Claims 10-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 02083473 in view of Bohm et al (US 6536562).

WO 02/083473 discloses all the limitations of the instant claims with exception to the use of rigidity in determining the first parameter. Bohm et al discloses a similar braking system and further teaches the use of rigidities the actuator control parameters to provide accurate control with minimum sensed information. It would have been obvious to one of ordinary skill in the art at the time the invention was made to include rigidity in the determination of the first parameter of WO 02/083473 to increase accuracy and improve performance.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bradley T. King whose telephone number is (571) 272-7117. The examiner can normally be reached on 11:00-7:30 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Siconolfi can be reached on (571) 272-7124. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
